	Application No.	Applicant(s)	
Office Action Summary			
	10/622,639	WENNING ET AL. /	
	Examiner Theo T. Trees	Art Unit	
The MAILING DATE of this communication app	Thao T. Tran pears on the cover sheet with the	1711 correspondence address	
Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).			
Status	d		
1) Responsive to communication(s) filed on			
l <u> </u>	 action is non-final.		
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is			
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.			
Disposition of Claims			
4)  Claim(s) 1-20 is/are pending in the application.  4a) Of the above claim(s) is/are withdray  5)  Claim(s) is/are allowed.  6)  Claim(s) 1-20 is/are rejected.  7)  Claim(s) is/are objected to.  8)  Claim(s) are subject to restriction and/or	vn from consideration.		
Application Papers  9) The specification is objected to by the Examine 10) The drawing(s) filed on is/are: a) acceed applicant may not request that any objection to the Replacement drawing sheet(s) including the correct and the correct of t	epted or b) objected to by the drawing(s) be held in abeyance. So ion is required if the drawing(s) is o	ee 37 CFR 1.85(a). bjected to. See 37 CFR 1.121(d).	
	animer. Note the attached Offic	e Action of form PTO-152.	
Priority under 35 U.S.C. § 119  12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  a) All b) Some * c) None of:  1. Certified copies of the priority documents have been received.  2. Certified copies of the priority documents have been received in Application No  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  * See the attached detailed Office action for a list of the certified copies not received.			
Attachment(s)  1) Notice of References Cited (PTO-892)  2) Notice of Draftsperson's Patent Drawing Review (PTO-948)  3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 10/20/03,10/07/03.	4) Interview Summar Paper No(s)/Mail D 5) Notice of Informal 6) Other:		

Application/Control Number: 10/622,639

Art Unit: 1711

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Grenda et al. (US Pat. 6,710,136).

The applied reference has a common Assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Grenda teaches a coating method and a coating composition containing a polyurethane powder; wherein the polyurethane powder comprises:

- A) 3-25% by weight of polyurea formed from at least one difunctional amine and isocyanate reactant in amounts such that the NCO/NH.sub.2 ratio ranges from 0.9 to 1.1:1;
- B) 35 to 75% by weight of at least one polyester synthesized from polyols and 15-100 mol. % of succinic acid or its anhydride, having an OH number of 20-250 mg KOH/g;

Application/Control Number: 10/622,639

Art Unit: 1711

C) 7 to 25% by weight of at least one curing agent of a blocked polyisocyanate, isocyanurate, uretdione or a combination thereof having a functionality of at least 2; and

D) 1 to 50% by weight of auxiliaries and additives;

wherein from 0.6 to 1.2 NCO groups are available per OH group of the resin (see claim 1).

Although Grenda is silent with respect to the melting point and the viscosity of the polyester, since the reference teaches the same chemical, its properties, such as melting point and viscosity, would inherently be the same as the presently claimed invention.

Grenda further teaches the method further comprising the steps of homogenizing the polyurethane powder in a melt; cooling the melt to from a solid; and pulverizing the solid to form a powder having particle size of less than 100 microns. The coating step comprises depositing the powder onto a metal substrate (iron panel) by electrostatic powder spraying; and the method further comprises curing the coating (see col. 3, ln. 21-35).

Grenda further teaches the use of isophorone diamine, isophorone diisocyanate, and leveling agents or pigments (see col. 2, ln. 44-48), and the blocker being triazoles or oximes (see col. 3, ln. 13-15). The gloss level, when the substrate is at an angle of 60o, is from 12-47 (see Table 2).

## **Contact Information**

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao T. Tran whose telephone number is 571-272-1080. The examiner can normally be reached on Monday-Friday, from 8:30 a.m. - 5:00 p.m..

Art Unit: 1711

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
